(54) WASHING NET FOR BRASSIERE

(57) Abstract:

PURPOSE: To wash a brassiere fed into a washing machine free from the shape destruction.

CONSTITUTION: A washing net is constituted of a bottom part 2 having a nearly round shape, curved shaped upper part 3 covering the cup part of a brassiere, and a reinforcing member 10 which possesses a certain rigidity and elasticity. The reinforcing member is installed at the ridge part of the upper part, seamed part of the bottom part and the upper part, or the side part of the upper part. The reinforcing member installed at the seamed part of the bottom part and the upper part is formed to a ring shape or endless form. The reinforcing member installed on the side part of the upper part has a compact tongue shape, or formed from a thick net member, and the upper edge of the reinforcing member is seamed with the ridge part of the upper part, and the lower edge of the reinforcing member is seamed with the seamed part of the bottom part and the upper part, or inserted into

the side part of the upper part by forming a pocket part. The reinforcing member inserted into the pocket part is made of the resin material which possesses floating performance.
